

USE-CASE FLOW SPECIFICATION

Use Case: Generate Weekly Meal Plan

Primary Actor: Subscriber

Related Requirement: FR-001

Preconditions

- 1.Subscriber has an active account and subscription.
- 2.Dietary profile, allergies, calorie goals and macro constraints are available.

Postconditions

- 1.Weekly meal plan is generated according to dietary constraints.
- 2.Excluded allergens are not included.
- 3.Generated plan is available for the Subscriber to view.

Main Success Scenario

- 1.Subscriber selects Generate Weekly Meal Plan.
- 2.System retrieves the Subscriber's dietary profile.
- 3.System validates allergies, calorie and macro constraints.
- 4.System identifies suitable meals.
- 5.System generates the weekly meal plan.
- 6.System displays the plan to the Subscriber.
- 7.Use case ends successfully.

Alternate Flow – No Suitable Meal

No suitable meal is available

- 1.System removes meals that conflict with dietary restrictions.
- 2.System searches for suitable alternatives.
- 3.If alternatives are found, System generates the meal plan.
- 4.If no alternatives are found, System informs the Subscriber and asks them to update their dietary constraints.
- 5.Use case ends.
